

Climate

Dual Temperature Merchandiser

"...expanding your vending opportunities..."

Crane Merchandising Systems continues to innovate with the latest addition to its extensive product range – the dual temperature Climate.

The Climate is flexible and versatile, both in machine configuration and range of products and offers operators a unique and compact vending solution which is ideal for smaller sites.

Machines are equipped with an adjustable divider which separates perishable foods and bottles from standard snacks and confectionery items. This health control feature allows food, snack, confectionery and bottled drinks to be offered from one single machine, maximising the vending opportunities for environments with limited space.

The Climate Advantage:

- The Climate offers dual temperature zones separated by an adjustable divider shelf.
- The divider shelf can be moved to create the specification most suited to the machine's location or user profile
- The lower zone is controlled by a temperature sensor and features user configurable health control
- The Climate can help to provide a healthy vending option for schools, sports centres, canteens etc
- Each machine is delivered equipped with special bottle trays and spirals to optimise product presentation and delivery
- The Climate exhibits superior insulation through a foamed-in-place cabinet and door, increasing overall operating efficiency and eliminating any sealing, condensation and temperature variation problems
- The Climate is fitted with **SureVend™** technology, the guaranteed product delivery system, ensuring complete customer satisfaction
- Heated dual pane gas-filled glass comes as standard, promoting energy efficient operation, improving insulation and preventing condensation
- Machines are available in a number of colours and designs to complement machines from the National Vendors and Stentorfield ranges

Flexible, Dual Temperature Zones

The Climate has been designed to meet the varying needs of today's busy vending environments and can help to provide a balanced range of snacks, chilled food and bottled drinks, promoting healthier products at education, business, hospital and leisure sites.

The Climate offers dual temperature zones. The lower zone can be configured to hold chilled food products along with standard bottles and is controlled by a temperature sensor which can be set between 2.2°C and 3.3°C with health control on (or between 2.2°C and 23.3°C with health control off). At the same time the upper zone, containing snacks and confectionery items, is stratified and will typically be set at 6°C to 9°C above the lower zone temperature when the lower zone is set with health control on.

The adjustable divider creates zones within the machine enabling the operator to create the specification most suited to the machine's location or user profile.

Integrated Merchandising Solutions

The Climate is styled to coordinate seamlessly with the existing range of food, snack and drinks machines available from Crane Merchandising Systems, creating a totally integrated merchandising solution.

Dual Spiral System

The well proven, dual spiral vending system fitted to snack and food trays is reliable, easy to adjust and suitable for a wide variety of products. The spirals gently but firmly support the products and smoothly move each item forward to the vend position.

The machine is quick and easy to restock with trays that tilt to 45°. This feature ensures that even the top shelf is within easy reach.

Large Capacity Bottle Trays

Climate machines are equipped with special, easy to load, bottle trays and spirals which optimise product presentation and delivery. The machine provides eight selections per tray and a capacity of 48 items.

The spirals are installed at a 45° angle, ensuring that the base of the bottle lands first in the cushioned delivery bin, guarding against damage to the machine and the bottle itself.

SureVend™ Product Delivery Sensor

The **SureVend™** product delivery sensor guarantees that selected items are delivered to the customer or their money is returned. The system works by attempting to deliver the product up to 3 times. Optic sensors detect whether the selected item has been delivered; if a product is not dispensed after 3 attempted vends, the customer is given the option of selecting another product or accepting a refund.

With the inclusion of **SureVend™** as a standard feature on the **Climate** spiral merchandiser, Crane Merchandising Systems are once again providing innovative technological advances that lead to increased customer satisfaction.

Price Rolls

Updating prices takes seconds with the innovative price roll system fitted to Climate machines. The operator simply rolls the price strip until the correct price is found.

Audit Information

The Climate is equipped with an innovative audit system which records sales information, aiding stock control and machine management.

This information can be recalled by the operator via the machine's display panel and a printed copy produced using a hand-held printer.

Choice of Payment Systems

Climate machines are compatible with the leading M.D.B. and Executive coin and cashless systems.

Either option can be fitted depending on the payment format required.

Climate

Specifications

- Height: 1830 mm (72 in.)
- Depth: 1010 mm (39.75 in.)
- Width: 968 mm (38.13 in.)
- Weight: 334 kg (734 lbs.)
- Refrigerant: R134A CFC Free

All weights and dimensions are approximate and are for guidance only.

Electrical Services

- Voltage: 220/240V AC
- Frequency: 50 Hz
- Current Rating: 7 amps (max)
- Refrigeration Unit: 220/240V - 1/2 hp compressor

Temperature Control

Programmable temperature range 2.2 - 3.3°C with health control enabled and 2.2 - 23.3°C with health control disabled.

Optional Features

- Compatible with leading M.D.B. and Executive Coin and Cashless Systems.
- Portable hand-held printer for data retrieval.

Capacities

Climate is available in 2 standard configurations as shown below.

20 Snack/Confectionery plus 16 Bottle Selections

Tray configuration : Snack (x2), Confectionery, Bottle (x2).

10	10	10	10	10
10	10	10	10	10
